SERMAT recrute un(e) ELECTRONIC WIRER

Ref. 24081202 - SERMAT SAS - CASTANET TOLOSAN - 12 août 2024

The NEUVESSEL group (more than 400 employees), which operates nationwide, particularly through its companies in Nanterre (92), Chabris (36) and Castanet Tolosan (31), develops and produces electromechanical equipment (servo-actuators) for aerospace and military applications.

Description entreprise :

The NEUVESSEL group (more than 400 employees), which operates nationwide, particularly through its companies in Nanterre (92), Chabris (36) and Castanet Tolosan (31), develops and produces electromechanical equipment (servo-actuators) for aerospace and military applications.

Type de poste :

Permanent employment contract

Rémunération :

Depending on background and experience

Lieu géographique :

SERMAT SAS - CASTANET TOLOSAN

Description du poste :

Reporting to the department manager and interacting with the laboratory technicians and cable technicians, you will be responsible for :

- Complete electronic boards with through-hole components, coils, connectors, etc.
- Fretting, gluing and varnishing according to the company's procedures.
- Integrate electronic boards into their housings and ensure/inspect correct assembly.
- Prepare electrical harnesses: shielding, twisted pairs, crimping contacts.

Profil recherché :

You are rigorous and methodical in monitoring manufacturing phases, and can be a driving force behind proposals to improve our assembly ranges for R&D projects.

Expérience recherchée :

You have significant experience in electronic wiring: working in a production
